

Bings

Fruit is firm, juicy and a deep mahogany red when ripe. Exceptionally large fruit of the finest quality with an intensely sweet, vibrant flavor. Bing has become the standard to which other varieties are compared.

Lapins

A large, highly crack-resistant, mahogany red cherry that is rapidly replacing the late-season variety Lambert. Lapins matures ten days to two weeks after Bing, exhibiting excellent firmness and flavor. As with all Northwest Cherries, Lapins creates a beautiful display.

Sweetheart

A large, bright red cherry maturing one week to ten days after Lapins (3 weeks after Bing). Sweetheart has a mild, sweet flavor and outstanding firmness. This heart-shaped cherry ships extremely well and will keep your late July and August cherry displays full.

Tieton

Extraordinarily large in size, with excellent firmness and a mild sweet flavor. Tieton is an early-season mahogany red cherry, ripening one week before Bing. The impressive size, attractively glossy fruit, and thick green stems produce a visually stunning fruit for premium displays.

Skeena

Large, very firm and sweet, Skeena continues to grow in popularity with consumers and growers. Maturing about 16 days after Bing, this dark red to almost black variety has a very dense texture. A great late-season variety which will keep you in cherries until the end of July.

Rainier

A very attractive, exceptionally large, yellow cherry with a bright red blush. Rainier has a distinctive and superior appearance among sweet cherry varieties. Delicately flavored with extraordinary sugar levels, the flesh is pure yellow, very firm and finely textured. A premium niche variety that ripens after Bing.
